With this picture book I would like to invite you to share all of your devotional love and spiritual longing with beings full of love you encounter here. The most important message of this book is to enhance and restore harmony within and the human being in his wholeness.

This picture book should speak to you as an entity of body, mind, feelings and intellect.

Through this a way is to Truth is opened, which is residing within yourself. We may accept a present of striking pictures.

As soon as you develop a close relationship with those pictures, they will start to speak to you – they will become your spiritual friends as they know everything about life.

You will learn to walk through life with a greater awareness and to act more in unison with God's Creation. Let's remember together our origin, the light that we all consist of.

The sun as the origin of light, warmth and life

The sun opens the way to our origin. It leads us into silence and helps us to spread the wings of our soul, to become one again with all the living beings that we humans have been created from. Therefore, keep the radiating picture in your heart, because the fountain of light of all the suns as the most excellent representative of God flows without end. There lies hope in it, which we will carry as a radiating light into the future.

Water is a mirror of the heart which allows the conscience to take on a form and shows this in pictures.
It is the silent language of life.

Aranda is called the messenger of Fire.
I am called the messenger of Water We share two things:
We both are humans with a pure heart,
and we are especially gifted with intuition and flashes of inspiration
that often do not follow the general trend of the time.

I succeeded in showing the true nature of frozen water with the help of a microscope,
with a method that is not ready at hand.
By "reading" water crystals which may seem to be mandalas with a mystical touch,
I realized what water wanted to tell us.
Aranda, on the other hand, is able to perceive the true nature of fire in its shining flames.
Fire lets us see far more than only a reflection of shining flames and flickering light.

I believe that the universe consists of two elements which depict the fundamental
relationship of negative and positive (Ying und Yang) energy: Fire and Water.
My long-time studies have led me to the conclusion that fire represents the energy of
love, and water the energy of gratitude.

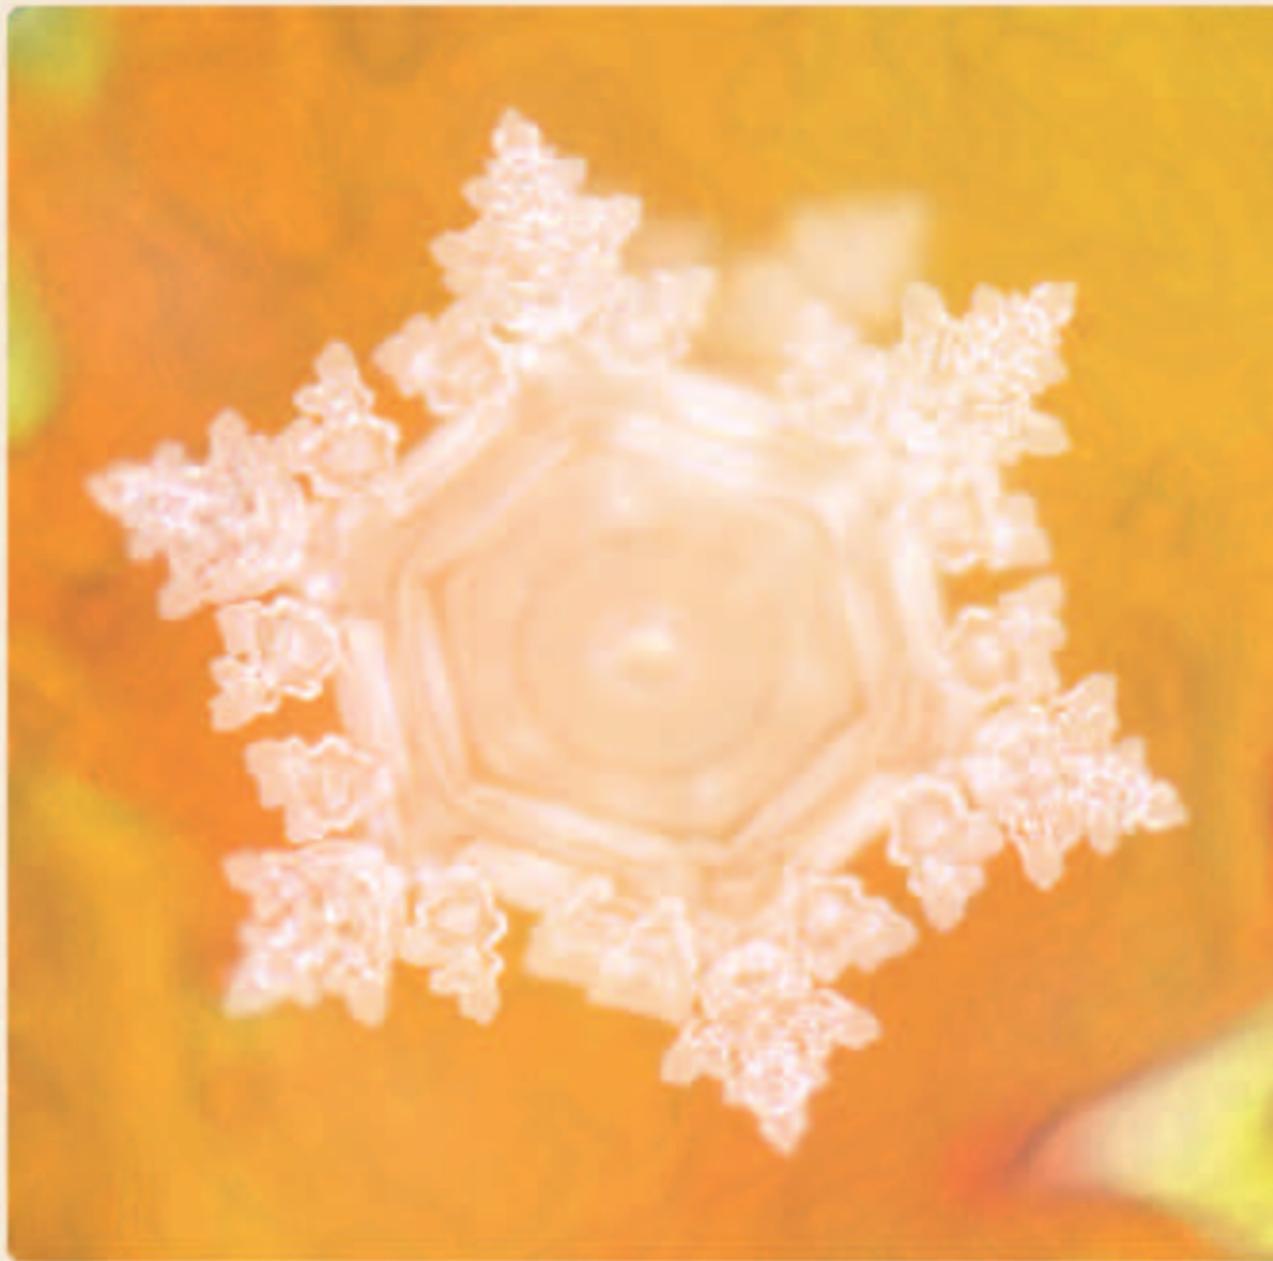

God created this world with fire and water. In other words:
Didn't he create the world with the energy of love and gratitude?
I hope you will read with delight this book: „And God speaketh: There shall be light”. In
my opinion this is a book about love, about Aranda's fire, which goes hand in hand with
my book “The Message of Water”, which I like to call a “book of gratitude”.
And I hope you will feel your own view of the universe
and the True Intention in which God created us.

Fire & Water

This book shows the cleansing and harmonizing power of Agnihotra with the help of the water crystal technology. Fire and water, ancient knowledge and modern insight meet in this small illustrated book designed by Aranda with the colours of fire. In this booklet holy fires join up with beautiful water crystals by the Japanese water scientist Dr. Masaru Emoto. In his preface Dr. Emoto writes: "Fire is Love and water is Gratitude."

Fire and water, Is there anything more antithetic than these basic elements. Here they are joined in harmony. They share the holiness of their origin, the holiness of their character and the holiness of their task to be fulfilled on Earth.

According to Shree Vasant and Aranda this booklet is also about the healing of water by holy fire. The holiness of fire and water was well known in ancient cultures. Today Shree Vasant and his disciples continue to spread the rituals of Agnihotra and Homa originating in the ancient Indian culture all over the globe. Through the sacred science of holy fires the Earth will be healed, and the prosperity of plants, animals and humans will be enhanced. And also love, harmony, happiness, well-being and mental development.

The New Earth

One more book by FIVEFOLD PATH MISSION, INDIA, German edition by ARANDA. Five years ago the National Association of Organic India already began to explore an agricultural technology that cannot be explained scientifically yet. In cooperation with fifty national scientists and Homa farms many experiments have been conducted all over the world. This book comprises the results of close to one hundred Homa farms. This agricultural technology is a new, completely revealed science from the ancient books of the Vedas for SAVING the Earth and HEALING the global environmental pollution.

Besides the books, also pendants have been created for the Peace Project in cooperation with Aranda. They can be ordered with different designs on the following website: www.emoto-peace-project.com

From late 2011/early 2012 onward a children's game will also be available, with which the children's imagination and enquiring mind are developed.

With this set consisting of cards with motifs from the children's book and a poster, on which all the motifs are „hidden“, the children (and adults, too) can experience playfully their abilities to „see and feel“ For more information and orders, please see : www.emoto-peace-project.com
